Launch of the new Nissan Qashqai with Maier parts

18/02/2014

With the arrival on the market of the second generation of the Qashqai at the end of last month, Nissan has gone a step further in comfort, driving pleasure and safety in the Crossover segment. Although the profile is very similar to that of its predecessor, it has more distinctive and sporty lines, which are complemented by the Maier-designed details for the Japanese brand, such as the front grille assembly (with high-gloss black paint finish) and the fog-lamps (with injection finish), both with chrome plated trims.
