Nissan Forum

06/10/2011

The Nissan FORUM, an exploratory design concept developed by Nissan Design America, Inc. (NDA), represents the next revolution in family transportation and makes its world auto show debut at the 2008 North American International Auto Show in Detroit in January.

Answering the challenge of making family passenger vehicles more appealing to both drivers and passengers, FORUM offers a wide array of innovative ideas – from its trackless sliding side doors and elimination of traditional B-pillars, to an interior featuring a multi-position swivelling 2nd row seat and next-generation entertainment and family communications technology.
